DETAILED ACTION

Claims 1-46 are pending in this application. Claims 1, 11, 21, 29, 37 and 42 are independent claims.

The present title of the invention is "Method and system of continuously scaling video images".

The Group Art Unit of the Examiner case is now 2676. Please use the proper Art Unit number to help us serve you better.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to processing playback video, classified in class 345, subclass 704.
 - II. Claims 21-46, drawn to operating video game using game controller, classified in class 345, subclass 156.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as processing playback video. Invention II has separate utility such as operating video game using game controller. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
